REMARKS

Claims 21-36 presently appear in this case. No claims have been allowed. The official action of September 8, 2000, has now been carefully studied. Reconsideration and allowance are hereby respectfully urged.

Briefly, the present invention relates to a method for treating a viral infection by administering a dose of interferon which is in excess of a dose of the same interferon which induces a pathological response when parenterally administered. Preferably, the dose is greater than 20×10^6 IU
